

## Quality Milk Management Services Ltd

### Sheep Milk Recording SOP

1. Wear a pair of **CLEAN DISPOSABLE GLOVES**. Wash excessively dirty teats with clean water and wipe dry with fresh paper towel
2. Discard 4-6 squirts of milk from each half (check for clots)
3. Fill the sample pot to at least  $\frac{3}{4}$  full with approximately half from each side
4. Shake the pot to ensure thorough mixing of the preservative
5. Label the pot with the sheep ID (**USING BLACK PERMANENT MARKER**)
